

Cochrane Workshops

Conducted by internationally
recognised Cochrane Trainers

Workshop 1

Developing a Protocol for a Cochrane Systematic Review

📅 24 – 26 Oct '23

🕒 0830 – 1700

For individuals that are in the process of or are considering authoring a Cochrane systematic review. It is most suited to authors who already have a registered title, but authors who have not yet identified a title will also benefit from the course and will be given assistance to develop a title.

Course Outline

- ✓ What is needed to complete a Cochrane protocol for an intervention review.
- ✓ Introduction to Cochrane and a brief overview of the format of a Cochrane systematic review.
- ✓ Mixture of presentations, small group activities, and hands-on computer sessions.
- ✓ Formulating clinical questions, locating studies, appraising risk of bias and basics of meta-analysis needed to write the methods section of a protocol
- ✓ Getting started on RewMan Web and an introduction to the new risk of bias tool, ROB2.

Workshop 2

Risk of Bias 2

📅 27 Oct '23

🕒 0830 – 1700

For Cochrane authors and others embarking on systematic reviews, who might like to know more about this new tool since many systematic reviews have been published using this tool.

Course Outline

- ✓ Covers each domain in detail with worked examples and a hands-on small group exercise using the ROB2 tool.
